## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Figures 17 and 17a drawn to claims 1-6 in Paper No. 9 is acknowledged. The traversal is on the ground(s) that the Examiner has not shown that it would be a serious burden to examine the entire application. This is not found persuasive because even though the groups are related and are in the same class, there are several specific limitations unique to each group and thus would cause a serious burden to the Examiner to have to search all related subclasses for each specific limitation and all related foreign and non-patent literature databases. The Applicant will have the opportunity to have the non-elected claims included once an allowable generic claim has been established, thus eliminating the need to file additional applications.

The requirement is still deemed proper and is therefore made FINAL.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Breithaupt.

Art Unit: 3637

Breithaupt teaches all the limitations of the above claims including a glazing bead (5) with u-shaped elongated legs (see Figure 1), mechanical means (6) cooperating with bridging member for securing panels (2, 3).

***Response to Arguments***

3. Applicant's arguments with respect to claims 5-6 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
